Portfolio

OVERVIEW

Data Engineer with 3 years of experience building scalable lakehouse pipelines using PySpark, Databricks, Delta Lake, Airflow, and AWS, focused on performance optimization and production reliability.

EXPERIENCE

WINDIFFERENT – BAIRESEDEV

Data Engineer, 03/2022 – Present

- Built large-scale ETL pipelines in PySpark on Databricks
- Orchestrated ingestion-to-consumption workflows with Airflow.
- Implemented Delta Lake governance with Unity Catalog
- Reduced storage costs by 50% through Spark optimizations
- Implemented unit tests and CI/CD pipelines to improve stability and reliability

SINERWARE – SAS

Software Development Engineer, 11/2020 – 03/2022

- Built and maintained database objects using Oracle PL/SQL, Apex, Python
- Optimized system performance, reducing load times by 95%
- Contributed end-to-end across design, development, testing, and delivery

PROJECTS

AI-POWERED SUMMARIZATION SYSTEM | CONTINUUM INFRASTRUCTURE SOLUTIONS, INC. | 2025

- Built RAG-based document summarization using OpenAI API
- Implemented ingestion, chunking, embeddings, and vector search
- Automated pipeline in Python for large document sets

EDUCATION

MSC ARTIFICIAL INTELLIGENCE – JOHANNES KEPLER UNIVERSITY – LINZ, AUSTRIA

2022–2025, Graduated with honors – GPA 1.65

BSC ELECTRONIC ENGINEERING — UNIVERSIDAD DEL VALLE – CALI, COLOMBIA

2015–2020, Thesis with honorable mention – PA 4.17/5

SKILLS

Python, SQL, PySpark, Spark, Airflow, Databricks, Delta Lake, AWS (S3, Glue, CDK), Git, OpenAI API, RAG, PyTorch, scikit-learn

Soft skills: Fast learner, proactive problem-solver, strong team collaboration
